WE DO MORE THAN ENERGIZE A POWER GRID

OG&E[®]

We Energize Life

At OG&E, We Energize Life

You may have heard this before ... So, what does that mean?

"Life" truly is everything: it's where we work and live. Where our children go to school. Where we shop, who we hang out with. It's the lives of our customers, our neighbors, our friends. And OG&E has an impact on it all.

"We Energize Life" means **we** take our role very seriously in providing life-sustaining and life-enhancing products and services, all while honoring our commitment to strengthen our communities. In fact, this is OG&E's noble purpose.

We energize our economy with a nearly \$5 billion economic impact, vitalizing businesses, big and small. We create employment opportunities for all our communities.

We energize those communities by volunteering more than 10,000 hours annually through partnerships with the United Way, Habitat for Humanity and many other organizations.

We energize our future by continually enhancing and improving our grid to shorten outages, increase reliability and maintain affordable rates for all of us.

So, you see, we energize a lot of things at OG&E. Or maybe, just one thing: we energize life.

We Energize

Happy **National Volunteer Month!** Public service is a core value of our company, so OG&E employees are offered 16 hours of paid volunteer time annually to serve our communities, however they desire. We contribute nearly 10,000 hours of volunteer service every year! We hope you'll celebrate this month by giving back to your community, too.

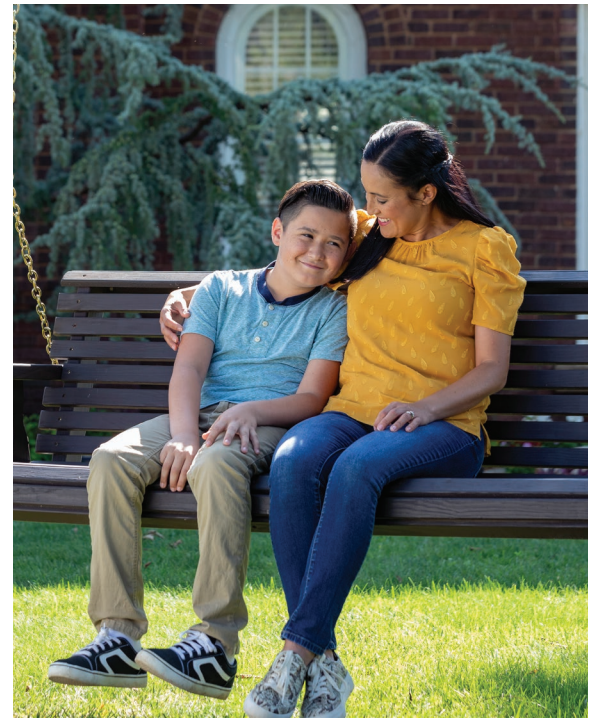

Who's up for saving some money?

If you **switch** to our SmartHours® price plan, you'll save money by simply **shifting** your energy use out of peak hours, which are 2 to 7 p.m. on weekdays. And the other 19 hours each summer weekday and all weekend? You can pay about half-price for electricity. All summer long (**June 1 – September 30**).

It costs more to generate electricity during those summer peak hours, Monday through Friday. There's more demand for electricity then, and more generation that has to happen. So, OGE offers an incentive to you to shift usage of electricity from those peak hours. Run your clothes washer and dryer in the morning, and your dishwasher later in evening when you're paying about half-price for electricity. Pre-cool your home or business before 2:00 p.m., then turn up the thermostat a few degrees during peak hours. It's that simple. The more you shift, the more you **save**. You are **always** in control of your comfort and your savings.

Switch, shift, save. Visit oge.com/smarthours or call **800-272-9741** to join thousands of neighbors saving money this summer.

Keep your cool this summer

We have two offerings you may qualify for to get your home ready for hot days ahead – both at no out-of-pocket cost to you!

- **OG&E Home Energy Assessment** – Available virtually or in-person, this assessment provides up to \$250 worth of energy-saving products, recommendations and resources. You will receive a comprehensive analysis of your home's energy use by a trained assessor as well as up to 15 LED bulbs, an advanced power strip and a custom Home Energy Report outlining recommended improvements. Simply complete an online Home Review at oge.com/heap or call **844-882-5746** to get started.
- **OG&E A/C Tune-up** – A contractor will inspect, measure and clean your A/C unit, covering costs up to \$200 and increasing its efficiency by up to 30 percent. You'll receive up to one pound of refrigerant and have better working equipment with improved comfort and humidity control. Get more details at oge.com/heap, call **844-882-5746** or email residentialactune@oge.com.

Increase your comfort and keep your bill lower this summer. Now that's cool.

Taking care of our environment and each other

The month of April includes Earth Day, Arbor Day and it's also National Safe Digging Month! Planting a tree to celebrate? Remember to dig safely with these tips:

- Look up and down before you dig. Power lines are located both overhead and underground.
- Plan ahead. Always call 811 at least 48 hours before digging, regardless of depth or familiarity with a property.

Let's all stay safe together.
