

OG&E'S SCHOOLS & GOVERNMENT EFFICIENCY PROGRAM FACT SHEET

Design

OG&E Arkansas provides incentives for energy-efficient upgrades to all educational and publicly funded facilities within our service territory. We'll help you secure the largest incentives available—which can often cover over 50 percent of the initial project costs. Free educational activities are also available to help administrative personnel identify and quantify energy efficiency opportunities.

Goals

Over the long term, we'll help your organization save money on utility bills, improve comfort and protect the environment through education, increased efficiency and responsible energy consumption.

Implementation

Program representatives will help determine what energy efficiency upgrades will work best for your facility. At your request, our building science team can perform a no-cost walkthrough of your facilities and recommend energy-saving improvements. Your facilities may also be compared to others in a benchmark study.

Recognition

Realizing energy and fiscal savings is worth celebrating. We'll help you publicize your success through a variety of media channels.

Eligibility

All publicly funded facilities located within the OG&E service territory are eligible to participate. Participation is on a first-come, first-served basis now through December 1 of the current program year, or while funds last.
