ARTICLE I PURPOSE OF AGREEMENT A. Producer intends to own and/or operate an electric power generating facility using cogeneration fuels derived from biomass, waste or renewable energy sources, including wind solar energy, or water to produce power. The Producer has either obtained from the Federal Energy Regulatory Commission (FERC) certification of this generating facility as a "Qualifying Facility" by FERC Rules or has filed notice with FERC that this generating facility meets the criteria for a "Qualifying Facility". A copy of either the certification on notice is attached to this agreement (Appendix "A"). Producer desires to operate such generation in parallel with the Company's system and sell a portion or all of the power produced to the Company. The Company has no direct financial involvement in the investment, construction, operation or maintenance of Producer's generation facility. The Producer has notified its insurance carrier of the existence of this generator installation. A copy of this notification is attached to this agreement (Appendix "B"). PSC File Mark Only

- D. The Company is willing to permit Producer to operate its generating facility in parallel with Company's system for the purpose of delivering power to the Company and to provide supplemental service to the Producer.
- E. The standard terms and conditions of purchase and the appropriate standard rate schedule, as approved by the Arkansas Public Service Commission are a part of this purchase agreement. Any exceptions or modifications to the standard terms and conditions of purchase or the appropriate standard rate schedule shall be explicitly set forth in writing in this purchase agreement. Such exceptions or modifications consist of the following _____ paragraphs.

ARTICLE II RATE

The Company shall pay to the Producer for the power and energy supplied to the Company, according to the terms and provisions of Rate Schedule______, attached hereto and made a part hereof (Appendix "C").

- A. The rate for purchase of power and energy from the Producer is based on the method of calculating such rate as established or approved by the Arkansas Public Service Commission.
- B. The Company's obligation for payments to Producer for power and energy deliveries to the Company shall commence on the date stated by the Company in its written approval for the Producer to commence parallel operation.
- C. The Company shall sell any electric power and energy delivered by the Company to the Producer under the provisions of the Company's applicable rate schedule.
- D. Billing for Electric Purchase by Company
 - 1. Consumer/Producer:

Billing for electric purchase shall be done by the Company in the same manner as billing for electric service sold to the Consumer/Producer. Invoices for purchases shall be prepared by the Company and submitted at the same time to the Consumer/Producer as a separate statement or as a separate item on the bill for electric service.
