

## SCHOOLS AND GOVERNMENT EFFICIENCY PROGRAM

### Design

OG&E provides incentive funding for energy-efficient upgrades and retrofits to all educational and publicly funded facilities within our service territory. Based on the energy-efficient measures you choose, we'll help you secure the largest incentives available. Free educational activities are also available, which are designed to help administrative personnel at facilities to identify and quantify energy efficiency opportunities.

### Goals

The program could cover up to one half the cost of each project. Over the long term, we're here to help participants save money on utility bills, improve comfort and protect the environment through education, increased efficiency and responsible energy consumption.

### Implementation

Program representatives will help facilities with participation in all our available services, and help determine what energy efficiency measures will work best for them.

At your request, our building science team can perform a no-cost walk-through of your facilities and recommend energy-saving improvements. Your facilities may also be compared to others that operate similarly in a benchmark study.

### Recognition

Realizing energy and fiscal savings is an important milestone that's worth celebrating. OG&E will partner with you to help make sure you have an opportunity to publicly share your success through a variety of media channels.

### Eligibility

All publicly funded facilities located within the OG&E service territory are eligible to participate.

### Timeframe

Participation is based on a first-come, first-served basis now through December 15 of the current program year, or while funds last.
