It is a combination of the customer charge, energy charge, and applicable riders. Winter Event Securitization will be listed here. HOW IS THE STANDARD RESIDENTIAL PRICE FOR ELECTRICITY CALCULATED?

The cost for electricity is a combination of the customer charge, energy charge, fuel adjustment amount, applicable taxes/fees and applicable riders.

Customer Charge:

A fixed monthly fee to cover a portion of the fixed cost of providing service to each customer and will not change based on the customer's monthly usage. This charge includes costs such as the meter, distribution system, billing and providing customer support. \$13 per customer per billing cycle (this is also the minimum monthly bill amount).

Energy Charge:

A charge that varies based on a customer's chosen rate and how much electricity (kWh) a customer uses each month. For residential and small business customers, this charge covers the cost of infrastructure to provide electricity to the customer. Residential rates shown below:

Summer Season

(Usage months of June through October of any year.)

First 1400 kWh per month @ 6.85¢ per kWh.

All additional kWh per month @ 7.60¢ per kWh.

Winter Season

(Usage months of November of any year through May of the succeeding year.)

First 600 kWh per month @ 6.85¢ per kWh.

All additional kWh per month @ 2.63¢ per kWh.

Fuel Adjustment Amount

This recovers the cost of fuel used to generate electricity. It also recovers any cost of electricity purchased from other suppliers. OG&E does not, and cannot by law, profit from the cost of fuel. Customers pay for the fuel used to generate electricity without markup.

Applicable Taxes/Fees

Sales taxes and franchise fees applicable to each customer. Franchise fees are the amount assessed by cities for use of the streets and alleyways. OG&E uses the streets and alleyways for its distribution system to deliver electricity to customers. In some areas, a gross receipts tax is assessed, in lieu of a franchise fee, for the same purpose.

Applicable Riders

There are two types of riders at OG&E:

1. **Optional Rates:** Programs to which customers subscribe, such as renewable energy programs.
2. **Cost Recovery Mechanisms:** Riders that recover costs outside of OG&E's control (e.g. storm restoration costs) and costs for major infrastructure projects, such as grid enhancement. Riders that recover costs outside of OG&E's control are expected to be in place for many years. Riders that recover project costs for particular programs (e.g. energy efficiency programs) are expected to last the duration of the program.

Rate Schedules and other riders include:

Residential, SmartHours® Fixed (formerly Time-of-Use, "TOU"), SmartHours Overnight (formerly EV-TOU), Residential Guaranteed Flat Bill (R-GFB), SmartHours Daily (formerly Variable Peak Pricing, "VPP"), General Service (GS), GS SmartHours Fixed, GS Guaranteed Flat Bill, GS SmartHours Daily, Oil and Gas Producers, Oil and Gas Producers TOU, Oil and Gas Producers VPP, Power and Light, Power and Light TOU, Large Power & Light Standard, Large Power and Light TOU, Public Schools-Small, Public Schools-Small-TOU, Public Schools-Small-VPP, Public Schools-Large, Public Schools-Large-TOU, Municipal Roadway and Area Lighting (closed), Outdoor Security Lighting (closed), LED Lighting, Municipal Water Pumping, Municipal Water Pumping TOU, Municipal Water Pumping VPP, Day-Ahead Pricing, Flex Price, Low Income Assistance Program Rider, Utility Solar Program, Green Power Wind Rider, Fuel Cost Adjustment Rider, Rider for Annual Public Utility Assessment Fee, Military Base Tariff Credit, Load Reduction Rider, Storm Cost Recovery Rider, Renewable Energy Program Rider, Tax Change Rider, Energy Efficiency Program Rider, Automated Metering (Smart Meter) Opt-Out Rider, Economic Development Incentive Credit Rider, Production Tax Credit Rider, Southwest Power Pool Cost Tracker, Grid Enhancement Mechanism, Energizing Renewable Connections, Outside Certified Territory Rate, Interim Rate Rider, Winter Event Securitization Mechanism.

HOW TO READ YOUR ELECTRIC METER

The meter scrolls through many different displays that will show your kilowatt-hour (kWh) usage and other system and diagnostic information.

Most of the scrolling digital displays are identified by a number in the bottom left corner of your meter. This number represents what type of data is being shown. For more information, visit [OGE.com/MeterFAQs](https://www.oge.com/MeterFAQs).

With Paperless Billing you can view your bill online, on the OG&E app and have it sent straight to your inbox instead of your mailbox. Sign up at [OGE.com/paperless](https://www.oge.com/paperless).

*The third party is not obligated to pay any past-due bills.

ELDERLY/PHYSICAL DISABILITY/LIFE THREATENING PLAN

The operator will verbally relay your typed message to our customer support advocate, who will answer verbally as the operator types back to you.
