

OG&E POSITIVE ENERGY® HOME

Your perfect home shouldn't involve compromises. That's why every OG&E Positive Energy Home is built from the ground up to meet rigorous standards for energy efficiency, comfort and quality.

Participating contractors focus on four key areas to help you achieve the greatest savings and comfort:

- Improved insulation
- High-performance windows
- Airtight ducts and construction
- High-efficiency heating and cooling equipment

Open the door to a more positive future at OGE.com/PEhome.

We Energize Life
.....

BETTER FROM *THE GROUND UP*

From the first blueprint to moving day, your qualified team will be here for you every step of the way. Here's how the Positive Energy Home process works:

1. **Blueprint for success**

Your builder will help you get started by reviewing your house plans and identifying energy-saving solutions that can save you money for years.

2. **Expert consultation**

Your builder will provide the information you need to choose energy-efficient improvements that are right for you.

3. **Inspection**

Our experts will thoroughly inspect your home during and after construction to ensure it meets or exceeds our strict building standards.

4. **Positive energy certification**

Your home is certified only after passing rigorous leak detection and air infiltration tests.
