

Health and Safety Policy

It's OGE's policy for the Company and its members to accept responsibility for operating its facilities and providing service to its customers in a safe manner. To this end the Company will:

- Comply fully with health and safety laws and regulations.
- Provide a safe and healthy workplace for its members, contractors, and visitors.
- Proactively reduce safety and health risks for its members, contractors, and visitors.
- Promote members' health and wellness.
- Continuously improve systems and processes that provide safeguards for the community and the workplace.
- Educate the public about the safe handling of Company products.
- Each member of the Company has a vital role to play in the execution of the Health and Safety system.

In addition, OGE has adopted Health and Safety Standards (H&S Standards) in order to establish the minimum requirements for functional area performance as it relates to health and safety management. H&S Standards are intended to further define the requirements of the Company's Health & Safety Policy and set forth the Company's expectations in meeting its obligation to shareholders, members, customers, and the general public.
