

OG&E SCHOOLS AND GOVERNMENT EFFICIENCY PROGRAM

FORT GIBSON SCHOOLS SWITCH ON THE SAVINGS

With help from OG&E's Schools and Government Efficiency Program, a district-wide lighting upgrade is saving Fort Gibson Public Schools thousands each year.

Getting Schooled in Efficiency

The Fort Gibson Public School District reached out to OG&E with concerns about its outdated lighting system and rising energy costs. Through the School and Government Efficiency Program, OG&E provides publicly funded facilities like Fort Gibson schools with guidance and incentives for energy efficiency projects.

OG&E's participating contractors performed a full lighting retrofit of the school district's kindergarten, middle school, high school, administrative offices and gymnasiums. That meant replacing each of the district's 1,621 T8 and T12 bulbs with longer-lasting, energy-saving LED bulbs. To offset the costs of the upgrades, OG&E provided the district with more than \$50,000 worth of incentives.

Thanks to these incentives and energy cost savings of more than \$27,000, the district is expected to recoup its investment within five years.

Lighting the Way to Savings

The success of the lighting retrofit inspired the district to also participate in OG&E's benchmarking services. By comparing Fort Gibson schools' energy performance metrics to similar buildings, OG&E's energy experts will be able to calculate the most cost-effective, energy-saving opportunities for the school district.
