

## OG&E **POSITIVE ENERGY**® HOME

Your perfect home shouldn't involve compromises. That's why every OG&E Positive Energy Home is built from the ground up to meet rigorous standards for energy efficiency, comfort and quality.

**Participating contractors focus on four key areas to help you achieve the greatest savings and comfort:**

- Improved insulation
- High-performance windows
- Airtight ducts and construction
- High-efficiency heating and cooling equipment

**Open the door to a more positive future at**

# BETTER FROM *THE GROUND UP*

From the first blueprint to moving day, your qualified team will be here for you every step of the way. Here's how the Positive Energy Home process works:

## 1. Blueprint for success

Your builder will help you get started by reviewing your house plans and identifying energy-saving solutions that can save you money for years.

## 2. Expert consultation

Your builder will provide the information you need to choose energy-efficient improvements that are right for you.

## 3. Inspection

Our experts will thoroughly inspect your home during and after construction to ensure it meets or exceeds our strict building standards.

## 4. Positive Energy certification

Your home is certified only after passing rigorous leak detection and air infiltration tests.

**Homeowners, please scan the code and contact one of the participating builders to get started.**
